NARRATIVE REPORT

As of September 10, 2025

RISK RESILIENCY PROGRAM
PROJECT LAWA AND BINHI
CY 2025

I. INTRODUCTION

The Risk Resiliency Program – Cash-for-Training and Work (RRP-CFTW) is a flagship initiative of the Department of Social Welfare and Development (DSWD) that seeks to strengthen the capacity of vulnerable communities to adapt to the impacts of climate change and natural disasters. Through a cash-for-training and work scheme, the program provides immediate financial support to beneficiaries while simultaneously engaging them in projects that promote environmental sustainability, food security, and disaster resilience. Within this framework, Project LAWA (Local Adaptation to Water Access) and Project BINHI (Building Initiatives for Nutrition and Household Income) were introduced to address pressing concerns on water scarcity and food insecurity brought about by El Niño, La Niña, and other climate-related hazards.

The Local Government Unit (LGU) of Malimono opted to avail of the program in partnership with DSWD Field Office Caraga after identifying three (3) barangays as climate-vulnerable based on hazard mapping, poverty data from Listahanan 3, and consultations with local stakeholders. With high poverty incidence and exposure to climate risks, the municipality recognized the need for a program that could provide both immediate relief through cash assistance and long-term resilience through community-based interventions. Availing of RRP-CFTW enabled the LGU to directly respond to the needs of its constituents while aligning local priorities with national resilience strategies.

Before the actual rollout, the LGU and its partner agencies conducted a series of pre-implementation and social preparation activities to ensure readiness and community participation. These included orientation sessions and consultations with barangay officials, community leaders, and beneficiaries to introduce the objectives of Projects LAWA and BINHI; the organization and mobilization of partner-beneficiary groups; and coordination with municipal offices such as the MSWDO, MDRRMO, and Municipal Agriculture Office for technical and logistical support. Training and orientation sessions were also held from June 4-6, 2025, covering topics on Disaster Risk Reduction and Management (DRRM), Climate Change Adaptation and Mitigation (CCAM), and the requirements of the Risk Resiliency Program. These activities ensured that the beneficiaries were well-informed, adequately trained, and prepared to implement the projects in their respective communities.

II. HIGHLIGHTS OF ACCOMPLISHMENTS

A. Physical and Financial Accomplishments

The Project LAWA at BINHI was officially launched on February 17, 2025, following the formalization of the Memorandum of Agreement (MOA) between the Department of Social Welfare and Development (DSWD) Field Office Caraga and the Provincial Local Government Unit (PLGU) of Surigao del Norte. The project covers three (3) barangays within the municipality, these barangays were prioritized due to their high poverty incidence, as indicated in the Listahanan 3 database of the National Household Targeting System for Poverty Reduction (NHTS-PR) and identified as one of the target areas based on DOST-PAGASA Climate Outlook..

For Fiscal Year (FY) 2025, the LGU of Malimono was allocated a total of ₱2,695,000.00 (Two Million Six Hundred Ninety-Five Thousand Pesos) in grants from the DSWD Field Office Caraga, intended as cash assistance for 350 identified partner beneficiaries.

As counterpart support, the LGU of Malimono provided in-kind contributions consisting of seedlings, gardening tools, and other agricultural materials necessary for the establishment and sustainability of the project sites. These provisions were allocated to support mobilization, community gardening activities, and livelihood strengthening initiatives. The details of the LGU's in-kind contributions are presented in Table 1.

Table 1. SUMMARY OF LGU COUNTERPART			
Budget Item	Fund Source	Amount	
		In Kind	In Cash
▪ 2pcs plastic Drum ▪ 1 roll hose	MDRRMO (70% Emergency Fund)	4,000.00	
▪ Assorted Vegetables Seeds ▪ 1 roll plastic mulch ▪ Logistical and mobilization support ▪ Food Provision (3 barangays)	MAO (General Fund)	5,000.00 3,500.00 20,000.00 10,000.00	
TOTAL		**42,500.00**	

The Local Government Unit (LGU) of Malimono, in collaboration with the DSWD Field Office Caraga, has successfully attained 100% completion of both physical and financial targets. The details of these accomplishments, measured against the output indicators established under the Risk Resiliency Program through Cash-for-Training and Work (RRP-CFTW), are presented in Table 2.

Table 2. PHYSICAL AND FINANCIAL ACCOMPLISHMENTS (DSWD GRANTS)						
Barangay	Number of Partner Beneficiaries			Amount of Cash Assistance		
	Target	Actual	Accomplishment (%)	Target	Actual	Accomplishment (%)
Cantapoy	200	200	100%	1,540,000.00	1,540,000.00	100%
Cayawan	90	90	100%	693,000.00	693,000.00	100%
Tinago	60	60	100%	462,000.00	462,000.00	100%
TOTAL	**350**	**350**	**100%**	**2,695,000.00**	**2,695,000.00**	**100%**

B. Project Implementation Activities

1. Stage 1 – Cash-for-Training: Advancing Climate Action

To ensure that participants were adequately prepared for the activities under Project LAWA at BINHI, the DSWD Field Office Caraga, in coordination with the Municipal Social Welfare and Development Office (MSWDO), Provincial Social Welfare and Development Office (PSWDO), Municipal Disaster Risk Reduction and Management Office (MDRRMO), and the Municipal Agriculture Office (MAO), facilitated a training and orientation session on June 4-6, 2025. The activity, which engaged 350 beneficiaries, was conducted at Barangay Cantapoy and Barangay Cayawan.

The Cash-for-Training for Stage 1 was implemented from June 4 to June 6, 2025, across the three (3) barangays. Resource persons from the Provincial and Municipal Disaster Risk Reduction Management Office (P/MDRRMO) served as key speakers and provided comprehensive discussions on Disaster Risk Reduction Management (DRRM) and Climate Change Adaptation and Mitigation (CCAM). Through these sessions, beneficiaries developed a deeper understanding of the scientific basis of climate change, its impacts on communities, ecosystems, and agriculture, as well as practical strategies to reduce risks, adapt to climate-related challenges, and adopt sustainable practices at the community level. Additionally, requirements for the Risk Resiliency Program (RRP) documentation and responses to frequently asked questions were thoroughly presented.

To initiate project implementation, a total of thirteen (13) training sessions were conducted. Partner beneficiaries who attended were provided with a detailed briefing and clear instructions on the roll-out of Phase 1: Project LAWA and Phase 2: Project BINHI, including a step-by-step guide on the commencement of activities.

2. **Stage 2 – Cash-for-Work: Project Local Adaptation to Water Access (LAWA)**

The Local Government Unit (LGU) of Malimono, in strong partnership with the DSWD Field Office Caraga, has successfully completed five (5) Project LAWA initiatives, marking a 100% accomplishment rate. Implemented on June 7–22, 2025, these projects were strategically designed to strengthen community resilience against the looming threats of El Niño, La Niña, and other climate-induced challenges, with a clear focus on ensuring sustainable and reliable water access for vulnerable communities.

A total of 350 partner beneficiaries actively took part in these initiatives, demonstrating both commitment and collective action towards climate adaptation. The summary of accomplishments for these projects is presented in Table 3.

Table 3. SUMMARY OF ACCOMPLISHMENTS FOR PROJECT LAWA

Barangay	No. of LAWA Projects		Percentage of Accomplishment
	Target	Actual	
Cantapoy	3	3	100%
Cayawan	1	1	100%
Tinago	1	1	100%

Note: The number of LAWA projects is based on the number of projects and sites

The LAWA projects in the municipality is focused on:

- **Diversification of water Supplies**

3. **Stage 2 – Cash-for-Work: Project Breaking Insufficiency through Nutritious Harvest for the Impoverished (BINHI)**

Project BINHI was officially ran from June 7-8, 2025, as a proactive initiative to strengthen community resilience against potential food scarcity brought about by El Niño, La Niña, and other extreme weather events. The project is anchored on the goal of ensuring sustained food availability and security for vulnerable households.

A total of 350 partner beneficiaries actively participated in the implementation of five (5) site-based projects under Project BINHI, fostering community collaboration and sustainable food production practices. The accomplishments of these projects are summarized in Table 4.

Table 4. SUMMARY OF ACCOMPLISHMENTS FOR PROJECT BINHI			
Barangay	No. of BINHI Projects		Percentage of Accomplishment
	Target	Actual	
Cantapoy	3 sites	3 sites	100%
Cayawan	1 site	1 site	100%
Tinago	1 site	1 site	100%

Note: The number of BINHI projects is based on the number of projects and sites

BINHI projects concentrated on:

- **Communal Vegetable Gardening**

In addition, Project BINHI supported the production of organic concoctions and Oriental Herbal Nutrients (OHN), along with the processing of organic fertilizers as part of the community's agricultural practices. These activities were carried out in cooperation with local organizations and government offices, ensuring shared responsibility, community ownership, and continuity of the projects.

4. Stage 3 – Cash-for-Training: Sustainability Programming

The Cash-for-Training for Stage 3 was carried out on June 23–24 in three (3) barangays of the municipality. A total of four (4) training sessions were held, which led to the formulation of two (3) Community Action Plans (CAPs).

C. Project Output Analytics

1. Project LAWA

The five (5) Diversification of Water Supply projects under LAWA are projected to generate a water capacity of 35,000 to 37,500 cubic meters, enough to support approximately 7,000 to 7,360 square meters or about 0.736 hectares of agricultural land.

2. Project BINHI

The five (5) BINHI project sites covered a total of 7,360 square meters of land, yielding an estimated 7,000 kilograms of food. This production is expected to benefit 7,000 individuals, or roughly 1,400 families within the community.

D. *Project Sustainability and Support*

To secure the long-term viability of Project LAWA at BINHI, a range of sustainability measures was carried out by the partner beneficiaries, barangays, and the municipal government. These efforts aim to preserve the functionality of the interventions, strengthen local capacity, and ensure community ownership. The following outlines the key actions undertaken to support the project's continuity:

1. Project Functionality

Regular maintenance and timely repair of water systems are being carried out to guarantee consistent and reliable access. Alongside this, the continued cultivation of high-yield crops using climate-resilient and locally adapted varieties helps secure food supply. To further support long-term productivity, organic farming practices such as crop rotation, composting, and the use of organic fertilizers are promoted to maintain soil fertility and ensure sustainable harvests.

2. **Community Involvement and Ownership**

At the barangay level, partner-beneficiary groups were organized and mobilized to take active roles in the implementation and monitoring of the projects. To strengthen accountability and ensure continuity, project responsibilities were formally turned over to legally registered organizations. Specifically, the two (2) sites (Purok 6 and Purok 5) of Barangay Cantapoy were entrusted to CANARBECO, while another site (Purok 4) was turned over to the Cantapoy-Dinaligan Farmers Irrigators Association, Incorporated. For Barangay Cayawan, it was turned over to Nagkahiusang Kababayen-an sa Barangay Cayawan (NACABACA), while in Barangay Tinago it was turned over to Progressive Leaders Tinago SLP Association.

3. **Capacity Building and Technical Support**

Local technical support teams were deployed to provide direct assistance in the field, ensuring that project sites received timely guidance and solutions to address emerging needs. Beyond immediate support, these teams also delivered ongoing mentoring and coaching to partner beneficiaries, equipping them with practical knowledge and skills necessary for managing day-to-day challenges. This continuous engagement not only strengthened the technical capacities of the communities but also promoted self-reliance, enabling beneficiaries to sustain project gains and confidently take ownership of future development efforts.

4. **Monitoring, Evaluation and Learning**

Regular monthly monitoring was undertaken through scheduled field visits to closely track the progress of implementation, evaluate the continuity of initiatives, and ensure the sustained functionality of the projects. These visits provided opportunities to identify strengths and challenges on the ground, gather feedback directly from beneficiaries, and recommend timely adjustments to improve outcomes. By maintaining consistent oversight, the implementing agencies and partner organizations were able to safeguard project standards, reinforce accountability, and strengthen community confidence in the long-term success of the initiatives.

5. **Financial Sustainability**

Active engagement with Local Government Units (LGUs) was undertaken to lobby for dedicated budget allocations covering project-related needs such as tools, materials, and training support. This advocacy was pursued during the Comprehensive Development Plan (CDP) formulation held on September 2–4, 2025, where LGUs were encouraged to integrate these requirements into their Annual Investment Plans (AIPs) and prioritize them accordingly ensuring that resources are readily available to sustain activities beyond the initial implementation. This commitment not only reinforced local ownership but also provided a steady stream of support for capacity-building, operations, and maintenance, thereby strengthening the long-term viability and impact of the projects at the community level.

6. **Institutional Support, Partnerships, and Advocacy**

Project strategies were actively lobbied during the Comprehensive Development Plan (CDP) formulation held on September 2–4, 2025, for integration into the Annual Investment Plans (AIPs) and to be prioritized in the allocation of resources. These strategies were systematically aligned with local government planning, budgeting, and monitoring systems to ensure institutional continuity and sustained support. By embedding initiatives within existing structures, projects are more likely to secure consistent funding, oversight, and technical assistance in the years ahead. At the same time, partnerships with municipal and barangay agriculture offices, water districts, nutrition councils, and other support agencies were strengthened, creating a network of stakeholders that collectively provide expertise, resources, and coordinated action. This collaborative approach not only reinforced the institutional foundation of the projects but also enhanced their capacity to deliver lasting benefits to the communities they serve.

Table 5 presents the list of project end-users who officially accepted the turnover of Project LAWA at BINHI, along with the corresponding frequency of project monitoring in each barangay.

Table 5. LIST OF PROJECT END-USERS				
Barangay	**Project Name**	**Frequency of Monitoring**	**Project-End User**	
			Group Name *(Do not abbreviate)*	**Agency/ Organized/ Registered**
Cantapoy (Site No. 1)	Diversification of Water Supply Communal Vegetable Gardening	Once to thrice a week	Cantapoy Agrarian Reform Beneficiaries Cooperative (CANARBECO)	Cooperative Development Authority CDA
Cantapoy (Site No. 2)	Diversification of Water Supply Communal Vegetable Gardening	Once to thrice a week	Cantapoy Agrarian Reform Beneficiaries Cooperative (CANARBECO)	Cooperative Development Authority CDA
Cantapoy (Site No. 3)	Diversification of Water Supply Communal Vegetable Gardening	Once to thrice a week	Cantapoy Dinaligan Farmers Irrigators Association Incorporated (CDFIAI)	Security of Exchange Commission (SEC)
Cayawan	Diversification of Water Supply Communal Vegetable Gardening	Once to thrice a week	Nagkahiusang Kababayen-an sa Barangay Cayawan (NAKABACA)	Registered
Tinago	Diversification of Water Supply Communal Vegetable Gardening	Once to thrice a week	Progressive Leaders Tinago SLP Association	Registered

Note: Frequency of monitoring may be categorized as weekly, monthly, or quarterly.

Table 6 presents the policy support provided for Project LAWA at BINHI by local government units, including enacted ordinances and passed resolutions that institutionalize or promote the sustainability of the projects.

E. *Innovations, Good Practices and Success Stories*

Best Practice: Leveraging Organized Farmers' Associations for Project Sustainability

A notable best practice in the implementation of Project LAWA and Project BINHI in Malimono is the strategic engagement and utilization of pre-existing community-based associations. Rather than forming new groups, the Local Government Unit (LGU) and DSWD Field Office Caraga partnered with already organized and accredited organizations such as the Cantapoy Agrarian Reform Beneficiaries Cooperative (CANARBECO), Cantapoy Dinaligan Farmers Irrigators Association Incorporated (CDFIAI), Nagkahiusang Kababayen-an sa Barangay Cayawan (NAKABACA), and the Progressive Leaders Tinago SLP Association.

By tapping into these well-established associations, the project ensured efficient mobilization of members, streamlined coordination, and effective management of project resources. These organizations already had operational systems, leadership structures, and community trust, which facilitated a smooth turnover of responsibilities and strong accountability mechanisms. Their involvement fostered active participation and ownership among

beneficiaries, making them not only recipients of assistance but also direct implementers and stewards of the interventions.

This approach avoided the delays and challenges that often come with organizing new groups, while strengthening the sustainability of the projects. The associations took lead roles in maintaining water supply systems, managing communal gardens, and sustaining food production initiatives under Project LAWA and BINHI. Their participation has been instrumental in ensuring that the gains of the program extend beyond the project timeline, contributing to long-term food security, water access, and community resilience.

The Malimono experience illustrates that leveraging the existing capacity of organized farmers', women's, and fisherfolk's associations is a highly effective practice in community-based climate resiliency programs. It serves as a replicable model for other municipalities, demonstrating how local organizations can be empowered as critical partners in addressing climate-related risks and sustaining development outcomes

F. IEC Dissemination and Media Mileage

As of September 10, 2025, the activities and accomplishments of Project LAWA and Project BINHI were regularly featured on the official Facebook account of the MSWDO Malimono, ensuring wider public awareness and transparency of implementation. The details of IEC dissemination and media mileage are presented in Table 7.

Table 7. IEC DISSEMINATION AND MEDIA MILEAGE	
Number of Facebook postings	1
Number of training sessions conducted (Stage 1 and 3)	8

G. Other Related Activities (training conducted/attended, advocacy activities, convergence strategies, etc.)

During the implementation of Stage 1: Cash-for-Training, additional relevant topics were incorporated into the standard DSWD training modules. These included the integration of various laws aimed at raising awareness and promoting the protection and welfare of vulnerable sectors. Table 8 provides the details of these related activities.

Table 8. TOPICS INTEGRATED DURING STAGE 1	
Law	**Description**
RA 9262	Anti-Violence Against Women and Their Children Act of 2004
RA 7610	Special Protection of Children Against Child Abuse, Exploitation and Discrimination Act

Note: Add any additional laws or related topics discussed during Stage 1.

In addition to discussions on health and safety protocols, training sessions also covered the following topics: (Please list down topics that were covered)

- Community-Based Disaster Risk Reduction and Management (CBDRRM)
- Establishment of Community-Based Vegetable Garden
- Organic Fertilizer Production

III. CHALLENGES AND RECOMMENDATIONS

AREA OF CONCERN	ISSUES AND CHALLENGES	ACTIONS TAKEN	RECOMMENDATIONS
Fund counterpart for Project LAWA at BINHI	Not originally included in the budget plan allocation.	Lobbied during CDP formulation and budget forum, for year 2026.	Integrate into Local Disaster Risk Reduction and Management (LDRRM) Plan

IV. WAYS FORWARD

Moving forward, the implementation of Project LAWA and Project BINHI will focus on sustaining community ownership by strengthening the participation of partner-beneficiary groups and people's organizations in project management, operation, and maintenance. Successful practices from the pilot sites will be considered for scaling up and replication in other barangays, especially those identified as highly vulnerable to climate-related risks and food insecurity. Continuous capacity development through training and mentoring on sustainable agriculture, water resource management, and climate adaptation will also be prioritized to build local expertise. In addition, project strategies will be mainstreamed into municipal and barangay development plans, investment programs, and budgets to secure long-term institutional support. Partnerships with agriculture offices, water districts, academic institutions, NGOs, and private stakeholders will be further strengthened to mobilize additional resources and technical assistance. To ensure accountability and effectiveness, regular monitoring and participatory evaluation will be conducted to track progress, assess outcomes, and improve approaches. Finally, active IEC campaigns and the documentation of best practices through social media, community events, and local forums will be sustained to raise awareness and encourage broader adoption of project strategies.

I. ANNEXES

All the following annexes have been compiled and uploaded to this link: **[Insert Link Here]**

A. Signed and Accomplished Community Action Plans (CAPs) of Partner Beneficiaries
B. Accomplished Monitoring, Evaluation, and Reporting (MER) Tool for Project LAWA
C. Accomplished Monitoring, Evaluation, and Reporting (MER) Tool for Project BINHI
D. Photocopies of Registration Documents of Organized Groups or Project End-Users
E. Photocopies of Resolutions Passed and Ordinances Enacted
F. Notarized Binding Agreements on Lot Utilization (e.g., Resolution, Memorandum of Agreement or MOA, Usufruct Agreement)

Municipal Mayor

CASH-FOR-TRAINING
Stage 1 – Advancing Climate Action
Learning Development Session

Ms. Karin Louise Q. Nietes, PDO II, delivered a presentation on ***Module 2: Introduction to the Risk Resiliency Program*, specifically *Session 2: The DSWD Risk Resiliency Program***, held at the Barangay Cayawan Gymnasium in Malimono, Surigao del Norte.

The topic ***"DSWD Mandates, Programs, and Services"*** under ***Module 2: Introduction to the Risk Resiliency Program*** was discussed by Ms. Faith Pinggoy, PDO II, during the session held at Barangay Caywan Gymnasium, Malimono, Surigao del Norte, with a total of 150 partner beneficiaries in attendance—90 from Barangay Cayawan and 60 from Barangay Tinago.

During the session conducted in Barangay Cantapoy, Malimono, Surigao del Norte, Mr. Rowelto E. Dumale Jr., LDRRMO III, facilitated ***Module 1: Understanding Disaster Risk Reduction and Management*** for 200 partner beneficiaries.

Mr Mark Anthony B. Orias presented the **RA 9262** ***"Anti-Violence Against Women and Their Children Act of 2004"***

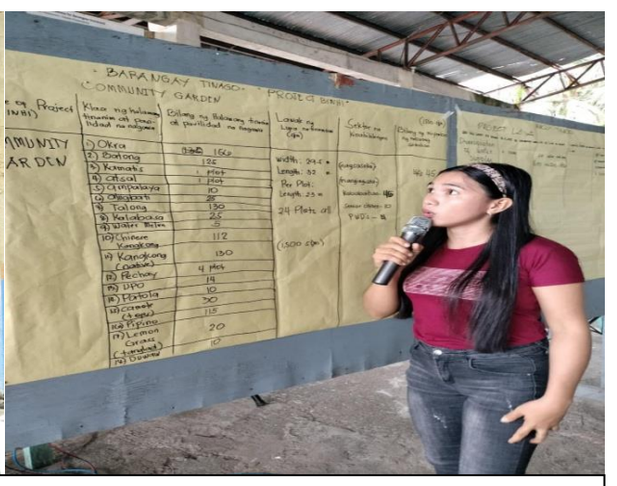
Ms. Sheba Mae G. Monte conducted a comprehensive explanation of ***Module 4: Implementation Guidance for Project LAWA at BINHI*** to the partner beneficiaries of Barangay Cantapoy, Malimono, Surigao del Norte.

Mr. Jerson Macahidhid discussed and explained the key components of **Project LAWA** (*Diversification of Water Supply*) and **Project BINHI** (*Communal Vegetable Gardening*) to the partner beneficiaries of Barangay Cantapoy, Malimono, SDN.

CASH-FOR-TRAINING
Stage 3 – Sustainability Programming
Learning Development Session

The partner beneficiaries from Barangay Cantapoy, covering three project sites, presented the outputs of ***Workshops 1, 2, and 3*** using the designated ***Assessment Tool***. Their presentations reflected their active participation and understanding of the workshop activities.

The ***community action plan*** was crafted and presented by the partner beneficiaries of Barangay Cayawan, Malimono, SDN



During the presentation of ***Workshop 1: Assessment Tool – Project LAWA at BINHI Assessment and Workshop 3: Community Action Plan*** of Barangay Tinago, Malimono, SDN.

CASH-FOR-TRAINING
Stage 3 – Sustainability Programming
Turnover Ceremony

During the Ribbon Cutting of ***Project LAWA (Diversification of Water Supply) and Project BINHI (Communal Vegetable Gardening)*** in Purok 4, Barangay Cantapoy, Malimono, SDN

During the Ribbon Cutting of ***Project LAWA (Diversification of Water Supply) and Project BINHI (Communal Vegetable Gardening)*** in Purok 5, Barangay Cantapoy, Malimono, SDN

During the Ribbon Cutting of ***Project LAWA (Diversification of Water Supply) and Project BINHI (Communal Vegetable Gardening)*** in Purok 6, Barangay Cantapoy, Malimono, SDN

During the Ribbon Cutting of ***Project LAWA (Diversification of Water Supply) and Project BINHI (Communal Vegetable Gardening)*** in Barangay Tinago, Malimono, SDN
