NARRATIVE REPORT
As of July 30, 2025

RISK RESILIENCY PROGRAM
PROJECT LAWA AND BINHI
CY 2025

I. INTRODUCTION

The **Risk Resiliency Program – Cash-for-Training and Work (RRP-CFTW)** is a social protection initiative by the Department of Social Welfare and Development (DSWD) of the Philippines. Its primary goal is to strengthen the adaptive capacity and resilience of vulnerable communities, particularly in the face of climate change and disaster risks.

A key component of this program is **Project LAWA at BINHI**, which stands for:

- **LAWA: L**ocal **A**daptation to **W**ater **A**ccess
- **BINHI: B**reaking **I**nsufficiency through **N**utritious **H**arvest for the **I**mpoverished

Project LAWA at BINHI is a DSWD-led initiative in partnership with other government agencies and local government units (LGUs). It is specifically designed to address water scarcity and food insecurity, particularly in areas affected by phenomena like El Niño and La Niña.

The program's core components are **Cash-for-Training (CFT)** and **Cash-for-Work (CFW)**. These components serve a dual purpose: providing financial support to beneficiaries while also empowering them with knowledge and skills to build community resilience.

Key Features and Objectives:

- **Holistic Approach:** The project integrates two crucial aspects of community resilience: water management and food security.
- **Water Access (LAWA):** This component focuses on improving water availability through various community-based projects. Examples include the construction of small farm reservoirs, rehabilitation of water harvesting facilities, and development of community irrigation systems.
- **Food Security (BINHI):** This part of the project addresses food insufficiency by promoting sustainable and climate-smart agricultural practices. Activities include establishing communal vegetable gardens, planting disaster-resilient crops and fruit-bearing trees, and engaging in urban gardening.
- **Cash-for-Training and Work:** Beneficiaries receive a daily wage, often based on the prevailing regional minimum wage rate, in exchange for their participation. The "training" part involves sessions on topics like disaster risk reduction, climate change adaptation, and practical skills in farming and water harvesting. The "work" part involves the hands-on implementation of the water and food projects.
- **Target Beneficiaries:** The program primarily targets poor and vulnerable families, including farmers, fisherfolk, indigenous peoples, women, solo parents, and other groups identified as most susceptible to climate-related hazards.
- **Community Empowerment:** The project is designed to be community-driven, encouraging a sense of ownership and collective action among residents. It involves beneficiaries in the planning and implementation of projects, ensuring that solutions are tailored to local needs and knowledge.
- **Sustainability:** Beyond the initial implementation, the project aims for long-term sustainability by establishing community associations to continue managing and maintaining the projects, thereby fostering lasting positive changes.

Local Government Units (LGUs) opt to avail of the Project LAWA at BINHI program for a combination of strategic and practical reasons, primarily driven by the need to address pressing local issues and align with national development goals.

1. **Addressing Local Vulnerabilities to Climate Change:** LGU Cagdianao, especially those in agricultural and coastal areas, are highly susceptible to the effects of climate change. The program directly tackles two of the most critical issues:
    - **Water Scarcity:** Prolonged dry spells and El Niño phenomena can devastate agricultural productivity and threaten the water supply for households. Project LAWA's focus on building small farm reservoirs and other water harvesting systems provides a tangible, community-based solution to this problem.
    - **Food Insecurity:** Climate-related disasters can wipe out crops and disrupt the food supply chain. The BINHI component, which promotes communal and backyard gardening of nutritious, climate-resilient crops, helps ensure that communities have a sustainable source of food even during a crisis.
2. **Financial and Technical Support from the DSWD:** Project LAWA at BINHI is a DSWD-led initiative with a substantial budget. For LGU-Cagdianao, this represents a significant opportunity to implement large-scale, high-impact projects without shouldering the full financial burden. The DSWD provides not only the funding for the Cash-for-Training and Cash-for-Work components but also technical expertise, training modules, and project monitoring. This national-level support greatly enhances the capacity of LGUs to manage disaster risk reduction and social protection programs effectively.
3. **Community Empowerment and Livelihood Generation:** The program's core model of Cash-for-Training and Work is a major draw for LGUs. Instead of simply providing dole-outs, the program empowers local residents with new skills and a sense of ownership.
    - **Temporary Employment:** The Cash-for-Work component provides a much-needed temporary income source for vulnerable families, helping them meet their daily needs while contributing to a community-beneficial project.
    - **Capacity Building:** The training sessions on disaster preparedness, climate change adaptation, and sustainable farming equip residents with skills that will serve them long after the project is completed, fostering long-term self-reliance.
4. **Alignment with National and Local Development Agendas:** By participating in Project LAWA at BINHI, LGUs demonstrate their commitment to the national government's priorities, particularly those related to food security, poverty reduction, and climate resilience. This alignment can lead to stronger partnerships with national agencies and open doors for future collaborative projects. The program also directly contributes to the LGU's own development goals, as it addresses social, economic, and environmental concerns simultaneously.

There were several processes that the LGU have undergone in partnership with other partner agencies and offices, that includes the following:

1. **Identification and Assessment:** The DSWD in partnership with the Provincial Government Unit of Dinagat Islands identified potential MLGUs to be included in the program. Municipality of Cagdianao is fortunate enough to be included in the list since some of the barangays were affected by EL Nino brought about by climate change that resulted to water scarcity especially in our agricultural areas.
2. **Partnership and Collaboration:** The implementation of the program is made possible through building good partnership and collaboration with other agencies such the Municipal Agriculture Office, Public Employment Service Office (PESO), Municipal Disaster Risk Reduction and Management Office (MDRRMO), Municipal Environment and Natural Resource Office (MENRO), Municipal Social Welfare and Development Office (MSWDO) and other national line agencies.
3. **Local Planning and Identification of Beneficiaries:**
    - The LGU, led by the MSWDO, conducts a local needs assessment to identify specific project sites (e.g., a suitable plot for a communal garden or a location for a water reservoir).
    - They are also responsible for identifying and validating the list of eligible beneficiaries, which typically includes farmers, fisherfolk, indigenous peoples, solo parents, and other vulnerable groups.

- The LGU also mobilizes and organizes the community for project implementation.

4. **Implementation and Monitoring:**
    - The DSWD provides the funding and technical expertise for the Cash-for-Training and Cash-for-Work components.
    - The LGU, particularly the MSWDO and the Municipal Agriculture Office, oversees the day-to-day implementation of the projects, including the training sessions and the physical labor. They work closely with DSWD field staff to ensure the project stays on track.
    - After the project's initial phase, the LGU takes on a more significant role in monitoring and providing ongoing support to ensure the long-term sustainability of the established sites. The DSWD often turns over the projects to the LGUs and community associations for continued maintenance and management.

The successful rollout of Project LAWA at BINHI in any Local Government Unit (LGU), including Cagdianao, requires a series of meticulous pre-implementation and social preparation activities. These steps are crucial to ensuring the project is effective, community-owned, and sustainable. They are designed to align the goals of the DSWD with the specific needs and context of the local community.

1. Community-Based Needs Assessment and Site Validation

The process begins with a comprehensive assessment of the target barangays. This isn't just a top-down evaluation; it's a collaborative effort between the LGU's Municipal Social Welfare and Development Office (MSWDO), Municipal Agriculture Office (MAO), the Public Employment Service Office (PESO),Municipal Disaster Risk Reduction and Management Office (MDRRMO), Municipal Environment and Natural Resources (MENRO), and the DSWD field office. Key activities include:

- **Vulnerability Mapping**: Identifying which communities are most susceptible to water scarcity and food insecurity, often based on historical data, climatic forecasts (like El Niño), and the DSWD's Listahanan database.
- **Site Identification**: Physically inspecting potential sites for the construction of small farm reservoirs (LAWA) and communal gardens (BINHI). The LGU and DSWD check for water sources, soil quality, and accessibility, ensuring the proposed projects are technically feasible and will benefit the most people.

2. Social Preparation and Stakeholder Mobilization

This is the "social" part of social preparation, focusing on building a foundation of trust and collaboration. It's about empowering the community from the start.

- **Courtesy Call and Coordination Meetings**: The DSWD and LGU officials hold meetings with barangay captains, council members, and key community leaders to explain the project's objectives, components, and the roles of each stakeholder. This ensures political buy-in and local support.
- **Community Assemblies and Orientation**: The project is formally introduced to the residents. This is where the DSWD and LGU explain the **Cash-for-Training (CFT)** and **Cash-for-Work (CFW)** components. They clarify the program's purpose—not as a dole-out, but as a tool for building community resilience and sustainable livelihoods. The community's active participation is highlighted as essential for success.

3. Identification and Validation of Beneficiaries

Selecting the right people to participate is critical. The process is transparent and aims to reach the most vulnerable households.

- **Screening and Profiling**: The MSWDO, in coordination with the DSWD, identifies potential beneficiaries based on a set of criteria. These often include:
    - Families with no stable source of income.
    - Small-scale farmers, fisherfolk, or marginalized groups.

- Solo parents, senior citizens, and persons with disabilities (PWDs).
- **Validation**: The list of potential beneficiaries is cross-checked and validated by the barangay council and community leaders to ensure the information is accurate and that the program reaches those who need it most.

4. Formation of Community Project Management Teams

To foster a sense of ownership, the community is encouraged to form a project management team or an association that will lead the implementation. This group is composed of beneficiaries who will oversee the day-to-day operations and future maintenance of the projects.

- **Roles and Responsibilities**: The team is oriented on their specific roles, such as financial management, procurement of materials (like seeds or tools), and monitoring project progress. This decentralizes management and builds local capacity.

5. Memorandum of Agreement (MOA) and Contract Signing

A formal MOA is executed between the DSWD and the LGU. This legal document outlines the responsibilities of each party, the project timeline, the budget allocation, and the deliverables. Simultaneously, individual contracts are signed between the DSWD and the beneficiaries for the Cash-for-Training and Cash-for-Work components, formalizing their participation and commitment to the project.

II. HIGHLIGHTS OF ACCOMPLISHMENTS

A. Physical and Financial Accomplishments

The Project LAWA at BINHI was rolled out on **March 11, 2025,** following the formalization of the Memorandum of Agreement (MOA) between the DSWD Field Office Caraga and PLGU of **Dinagat Islands.** The project covers **2** barangays across the municipality. These areas were identified as vulnerable based on the identified barangay needing the Project LAWA and BINHI and were prioritized due to high poverty incidence, as reflected in the Listahanan 3 database of the National Household Targeting System for Poverty Reduction (NHTS-PR).

For FY 2025, the LGU of **Cagdianao** was allocated a total of **₱1,540,000.00 / one million five-hundred forty thousand pesos** by the DSWD Field Office Caraga in grants, intended as cash assistance for **200** partner beneficiaries.

With this amount, the LGU of **Cagdianao** provided a counterpart contribution of **₱100,000.00** under **the Supplemental Budget**, allocated for **farm inputs** Table 1 shows the details of the LGU Counterpart.

Table 1. SUMMARY OF LGU COUNTERPART			
Budget Item	Fund Source	Amount	
		In Kind	In Cash
	Supplemental Budget	100,000.00	
TOTAL		**100,000.00**	

As of **June 11, 2025**, the LGU of **Cagdianao** in partnership with DSWD Field Office Caraga, has successfully achieved **100%**accomplishment of both physical and financial targets. Table 2 presents the physical and financial accomplishments based on the output indicators set under the Risk Resiliency Program through Cash-for-Training and Work (RRP-CFTW).

Table 2. PHYSICAL AND FINANCIAL ACCOMPLISHMENTS (DSWD GRANTS)						
Barangay	Number of Partner Beneficiaries			Amount of Cash Assistance		
	Target	Actual	Accomplishment (%)	Target	Actual	Accomplishment (%)
Cabunga-an	80	80	100%	₱616,000.00	₱616,000.00	100%
Laguna	120	120	100%	₱924,000.00	₱924,000.00	100%
TOTAL	**200**	**200**	**100%**	**₱1,540,000.00**	**₱1,540,000.00**	**100%**

B. Project Implementation Activities

1. Stage 1 – Cash-for-Training: Advancing Climate Action

To equip and prepare participants for the activities under Project LAWA at BINHI, the DSWD Field Office conducted a training and orientation session spearheaded by the Municipal Social Welfare and Development Office (MSWDO) and Municipal Agriculture Office, with the participation of **200** beneficiaries on held at the **brgy. Gymnasium of 2 barangays.**

The cash-for-training for Stage 1 was implemented from **May 21 to 23, 2025**, across the 2 barangays. DRMD personnel, as one of the resource speakers, discussed and introduced key topics on Disaster Risk Reduction Management (DRRM) and Climate Change Adaptation and Mitigation (CCAM). The beneficiaries gained a better understanding of these topics through scientific explanations of climate change, its impacts on communities, ecosystems, and agriculture, as well as practical strategies on how to effectively reduce risks, adapt to climate-related challenges, and implement sustainable practices at the community level. In addition, the requirements for the Risk Resiliency Program (RRP) documentary and frequently asked questions were thoroughly discussed.

To kickstart the implementation, a total of **2** training sessions was conducted (Municipal Agriculture Office, MDRRMO, PNP, and the partner beneficiaries who attended, received a briefing and instructions on establishing Phase 1: Project LAWA and Phase 2: BINHI, including a step-by-step guide on how to commence the activities.

2. Stage 2 – Cash-for-Work: Project Local Adaptation to Water Access (LAWA)

The LGU of **Dinagat** in partnership with DSWD Field Office Caraga, has successfully implemented **2** projects under LAWA, achieving **100%** accomplishment. Project LAWA was established on **May 26- June 10, 2025,** to prepare communities for the possible scarcity of water caused by the El Niño phenomenon, La Niña, and related climate impacts, aiming to ensure sustainable water access. A total of **100** partner beneficiaries participated in **4** projects under Project LAWA. Table 3 summarizes the accomplishments of these projects.

Table 3. SUMMARY OF ACCOMPLISHMENTS FOR PROJECT LAWA			
Barangay	No. of LAWA Projects		Percentage of Accomplishment
	Target	Actual	
Cabunga-an	1	1	100%
Laguna	3	3	100%
Total	**4**	**4**	**100%**

Note: The number of LAWA projects is based on the number of projects and sites

The LAWA projects in LGU Cagdianao focused on:

- Diversification of water sources

3. Stage 2 – Cash-for-Work: Project Breaking Insufficiency through Nutritious Harvest for the Impoverished (BINHI)

Project BINHI was established on **May 26- June 10, 2025,** to prepare communities for possible food scarcity caused by El Niño, La Niña, and other extreme weather events, ensuring food availability and security. A total of **100** partner beneficiaries participated in **4** projects under Project BINHI. Table 4 summarizes the accomplishments of these projects.

Table 4. SUMMARY OF ACCOMPLISHMENTS FOR PROJECT BINHI			
Barangay	No. of BINHI Projects		Percentage of Accomplishment
	Target	Actual	
Cabunga-an	1	1	100%
Laguna	3	3	100%
Total	**4**	**4**	**100%**

Note: The number of BINHI projects is based on the number of projects and sites

BINHI projects concentrated on:

- Establishment of communal vegetable gardens

In addition, BINHI supported the production of organic concoctions and Oriental Herbal Nutrients (OHN), as well as planting of disaster-resilient crops such as corn, sweet potato, and cassava. These projects were collaboratively managed and sustained by local organizations and government units, ensuring community ownership and continuity.

4. Stage 3 – Cash-for-Training: Sustainability Programming

The cash-for-training for Stage 3 was implemented from **June 13 and 17, 2025**, across the **2** barangays in the municipality. A total of **6** training sessions was conducted, resulting in the formulation of **2** Community Action Plans (CAP). **Annex A** provides the details of CAP per barangay.

C. Project Output Analytics

1. Project LAWA

The **2** LAWA projects are expected to provide a total of 840 cubic meters water capacity, potentially supporting approximately 12,000 square meters or **1.2** hectares of agricultural land. **Annex B** provides detailed metrics of accomplishments and analytics for Project LAWA.

2. Project BINHI

The **2** BINHI initiatives utilized approximately **12,000** square meters of land, producing an estimated **54,050** kilograms of food. This output is projected to benefit **1635** individuals or approximately **327** families in a month. **Annex C** provides detailed metrics of accomplishments and analytics for Project BINHI.

D. Project Sustainability and Support

To ensure the long-term viability of **Project LAWA at BINHI**, various sustainability and support mechanisms were implemented by the partner beneficiaries, barangays, and the municipal government. These strategies were designed to maintain the functionality of the interventions, build local capacity, and foster community ownership. The following summarizes the key actions undertaken to support the continuity of the project:

1. Institutionalization through Local Legislation and Budgetary Allocation

For the project to have a lasting impact, it must be integrated into the LGU's official governance and financial plans.

- **Passing of a Municipal Ordinance:** The Sangguniang Bayan (Municipal Council) of Cagdianao should pass a municipal ordinance that institutionalizes Project LAWA at

BINHI as one of the programs for climate change adaptation and food security. This ordinance would:
    - Mandate the inclusion of LAWA at BINHI projects in the Municipal Development Plan.
    - Formally recognize the community associations as project partners.
- **Annual Budgetary Allocation:** The LGU should allocate a dedicated budget from its General Fund or its 5% Local Disaster Risk Reduction and Management Fund (LDRRMF) for the maintenance, repair, and expansion of the projects.
    - The **Municipal Agriculture Office (MAO)** and **Municipal Social Welfare and Development Office (MSWDO)** should propose a line item in their annual budget for "Project LAWA at BINHI Sustainability."
    - This fund can be used for procuring replacement parts for water pumps, purchasing new seeds and agricultural inputs, and providing technical support and honoraria for community coordinators.

2. Strengthening Community-Based Organizations (CBOs)

The transition of ownership to the community is not a one-time event; it's a process of continuous support and empowerment.

- **Formalization and Registration:** The community associations formed during the social preparation phase (e.g., farmers' associations) should be formally registered with the appropriate government agencies, such as the Securities and Exchange Commission (SEC) or the Cooperative Development Authority (CDA). This gives them legal personality, allowing them to apply for grants, open bank accounts, and enter into formal agreements.
- **Leadership and Management Training:** The LGU, in partnership with the DSWD and other agencies, should conduct follow-up training sessions on:
    - **Financial Management:** How to manage project funds, keep records, and apply for additional funding.
    - **Project Management:** How to create work plans, monitor progress, and resolve conflicts.
- **Self-Sustaining Livelihood Projects:** The LGU can encourage the CBOs to develop small, income-generating projects related to the LAWA and BINHI sites. This could include selling surplus produce at Kadiwa ng Pangulo (Weekly Tabo ng Barnagay), processing crops, or even renting out tools and equipment to other farmers in the community. This creates a fund for future maintenance.

3. Inter-Agency and Inter-Barangay Collaboration

Sustainability is a collective responsibility, requiring a coordinated effort from various government offices and community leaders.

- **Creation of a Technical Working Group (TWG):** A TWG composed of representatives from the MAO, MSWDO, Municipal Engineering Office, and Municipal Disaster Risk Reduction and Management Office (MDRRMO) should be formed.
    - This group will be responsible for providing ongoing technical assistance and monitoring the projects.
    - They will conduct regular site visits, troubleshoot problems, and provide expert advice on farming and water management.
- **Sharing of Best Practices:** The LGU can facilitate meetings or workshops among the different barangay-level associations to share best practices and lessons learned. This fosters a sense of unity and allows successful models from one barangay to be replicated in others.

4. Community Monitoring and Reporting

For the community to truly own the projects, they must be involved in monitoring their progress and reporting their successes and challenges.

- **Regular Reporting:** The CBOs can be required to submit a simple quarterly or semi-annual report to the MSWDO and MAO. This not only keeps the LGU informed but also serves as a mechanism for the community to review their own progress and identify areas for improvement.
- **Community Assemblies:** Regular community assemblies should be held to provide project updates to all residents, not just the beneficiaries. This ensures transparency and broad community support.

By implementing these mechanisms, the Municipality of Cagdianao can ensure that Project LAWA at BINHI evolves from a temporary DSWD-led program into a self-sustaining, community-driven initiative that builds lasting resilience against climate-related challenges.

Table 5 presents the list of project end-users who officially accepted the turnover of Project LAWA at BINHI, along with the corresponding frequency of project monitoring in each barangay.

Table 5. LIST OF PROJECT END-USERS				
Barangay	**Project Name**	**Frequency of Monitoring**	**Project-End User**	
			Group Name *(Do not abbreviate)*	**Agency/ Organized/ Registered**
Cabunga-an	Construction of Small Farm Reservoir & Communal Vegetable Gardening	Once a month	Cabunga-an Vegetable Growers Association	Organized
Laguna	Diversification of Water Supply & Communal Vegetable Gardening	Once a month	Laguna Farmers Association	Registered
		Once a month	Cagdianao Farmers Agriculture Cooperative	Registered
		Twice a month	Upper Laguna Farmers Agrarian Reform Cooperative	Registered

Note: Frequency of monitoring may be categorized as weekly, monthly, or quarterly.

Table 6 presents the policy support provided for Project LAWA at BINHI by local government units, including enacted ordinances and passed resolutions that institutionalize or promote the sustainability of the projects.

Table 6. LIST OF POLICY SUPPORT				
Barangay	**Project Name**	**Local Support Policy**		**Description**
		No. of Ordinances Enacted	**No. of Resolutions Passed**	
Cabunga-an		**None**	**None**	
Laguna		**none**	**None**	
TOTAL				

E. Innovations, Good Practices and Success Stories

As far as best practices are concerned, the Local Government Unit of Cagdianao had ensured the continuity of the project by providing financial support for the 2026 project implementation amounting to two hundred thousand pesos (200,000.00) chargeable against 70% of the 5% Local Disaster Risk Reduction and Management Fund (LDRRMF).

Further, the LAWA AT BINHI project beneficiaries became partners in providing vegetables or food to the 4 WE CARE Program beneficiaries, one of the Programs implemented by Department of Social Welfare and Development in the Municipality of Cagdianao.

F. IEC Dissemination and Media Mileage

As of June 30, 2025, the LGU Cagdianao, in partnership with DSWD Field Office Caraga, has actively disseminated Information, Education, and Communication (IEC) and updates through MIO NAN CAGDIANAO

Table 7 outlines the details of IEC dissemination and media mileage.

Table 7. IEC DISSEMINATION AND MEDIA MILEAGE	
Number of quote cards posted	0
Number of news articles posted	0
Number of Facebook postings	5
Number of IEC materials distributed	0
Number of IEC materials yet to be distributed	0
Number of information caravans conducted	0
Number of training sessions conducted (Stage 1 and 3)	2

G. Other Related Activities (training conducted/attended, advocacy activities, convergence strategies, etc.)

During the implementation of Stage 1: Cash-for-Training, additional relevant topics were incorporated into the standard DSWD training modules. These included the integration of various laws aimed at raising awareness and promoting the protection and welfare of vulnerable sectors. Table 8 provides the details of these related activities.

Table 8. TOPICS INTEGRATED DURING STAGE 1	
Law	**Description**
RA 9262	Anti-Violence Against Women and Their Children Act of 2004
RA 7610	Special Protection of Children Against Child Abuse, Exploitation and Discrimination Act
RA 11930	Anti-Online Abuse or Exploitation of Children (OSAEC)
RA 11313	Safe Spaces Act or "Bawal Bastos" Law
RA 9165	Comprehensive Dangerous Drugs Act of 2002

In addition to discussions on health and safety protocols, training sessions also covered the following topics:

- Basic First Aid and Life Support
- RA 10121 Strengthening Philippine Disaster Risk Reduction Management Act of 2010
- Seedling Propagation and Nursery Establishment
- Concoction and Oriental Herbal Nutrients (OHN)
- Organic Fertilizer Production

Moreover, DOLE personnel, including Municipal Public Employment Service Office (PESO) Manager, were tapped during the Stage 3 implementation to conduct orientations on the registration of Rural Workers' Associations.

III. CHALLENGES AND RECOMMENDATIONS

AREA OF CONCERN	ISSUES AND CHALLENGES	ACTIONS TAKEN	RECOMMENDATIONS
BINHI	No funding for the farm inputs	Lobby to the LCE for possible funding	Integrate in the local plans for fund allocation
LAWA	Distance from the source of water	Lobby for materials such as hose to ensure transmission of water from source to the area of Lawa	Proper site inspection is recommended to ensure proper and exact measures to be implemented. Technical inputs are vital before and during the implementation
Maintenance of the project	Unmaintained LAWA at BINHI projects	Enclosure to the food-for-work proposal	Ensure proper emplacement of project maintenance scheme for the continuity of the project.

IV. WAYS FORWARD

To conduct continuous project monitoring with different partners. Referral for possible capacity enhancement of the RRP-CFTW Project LAWA at BINHI partner beneficiaries.

V. ANNEXES

All the following annexes have been compiled and uploaded to this link:
https://drive.google.com/drive/folders/1ejwinoc5-WHx5nIZ7IRcKFjJ66WpQB1o

A. Signed and Accomplished Community Action Plans (CAPs) of Partner Beneficiaries
B. Accomplished Monitoring, Evaluation, and Reporting (MER) Tool for Project LAWA
C. Accomplished Monitoring, Evaluation, and Reporting (MER) Tool for Project BINHI
D. Photocopies of Registration Documents of Organized Groups or Project End-Users
E. Photocopies of Resolutions Passed and Ordinances Enacted
F. Notarized Binding Agreements on Lot Utilization (e.g., Resolution, Memorandum of Agreement or MOA, Usufruct Agreement)
G. Photo and Video Documentation/Compilation

Prepared by:

ESMERALDA A. SENDIONG, RSW
MSWDO/Municipal Focal Person

Noted by:

ADOLFO E. LONGOS
Municipal Mayor

CASH-FOR-TRAINING

Stage 1 – Advancing Climate Action Learning Development Session

During the 3-day Stage 1 Cash-for-Training at Brgy. Cabung-an, Cagdianano

During the 3-day Stage 1 Cash-for-Training at Brgy. Laguna, Cagdianano

CASH-FOR-TRAINING

Stage 3 – Sustainability Programming
Learning Development Session

During the Stage 3 Day 1 Cash-for-Training at Brgy. Cabunga-an, Cagdianao

During the Stage 3 Day 1 Cash-for-Training at Brgy. Laguna, Cagdianao

CASH-FOR-TRAINING

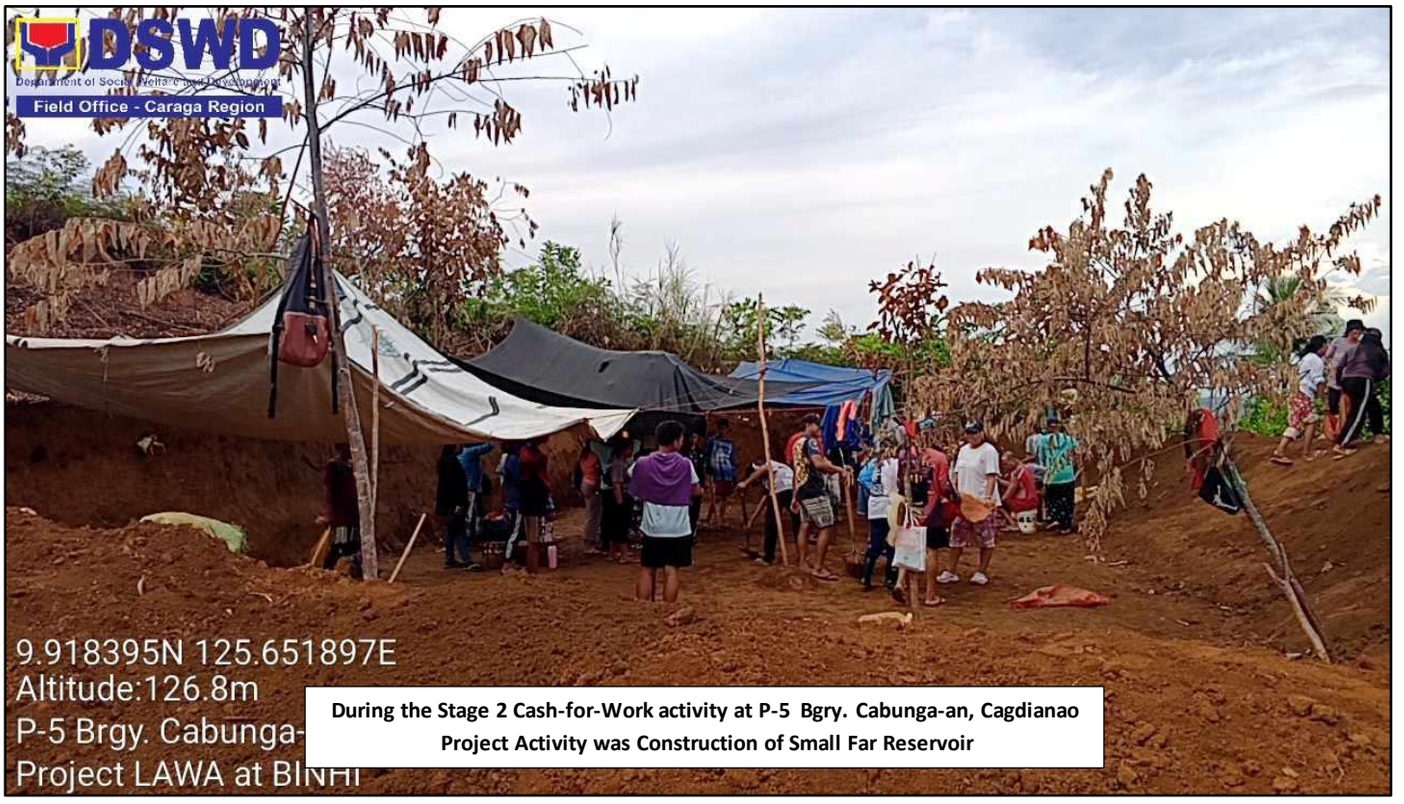
Stage 3 – Sustainability Programming Turnover Ceremony

During the Stage 3 Day 2 Turn Over Ceremony at Brgy. Cabunga-an, Cagdianao, with RRP PDOs & Sir Rene Solon of FO Caraga, MSWDO Staff, MAO & Barangay Councils

During the Stage 3 Day 2 Turn Over Ceremony at Brgy. Laguna, Cagdianao, with RRP PDOs & Sir Rene Solon of FO Caraga, MSWDO Staff, MAO & Barangay Councils

CASH-FOR-WORK

Phase 1: Establishment of Project LAWA



During the Stage 2 Cash-for-Work activity at P-5 Bgry. Cabunga-an, Cagdianao
Project Activity was Construction of Small Far Reservoir

During the Stage 2 Cash-for-Work activity at P-4 Bgry. Laguna, Cagdianao
Project Activity was Diversification of Water System

CASH-FOR-WORK

Phase 2: Establishment of Project BINHI

During the Stage 2 Cash-for-Work activity at P-5 Bgry. Cabunga-an, Cagdianao Establishment of Communal Gardening

During the Stage 2 Cash-for-Work activity at Brgy. Laguna, Cagdianao Establishment of Communal Gardening
