Challenges and Action Taken

During implementation, the challenges that we encountered are:

- There are some important documents that are late to consolidate in the barangay because some of the beneficiaries could not follow the instructions.
  - Requirements should be complied earlier before the date of the implementation of the program to avoid unnecessary problems of the required papers.
- There are some beneficiaries that are not serious with their work because they thought was others would not maintain the communal garden from time to time.
  - BLGU, DSWD and MAO will visit the said barangays if the communal gardens are well-maintained and taking good care of.

Recommendation;

- BLGU, DSWD and MAO will conduct monthly site visit to check the progress of planted fruits and vegetables.
- Implement policies and guidelines to ensure the sustainability of the project and the *bayanihan* of the beneficiaries.
